Designer on a Mac computer

Professional Summary

Senior product designer with an M.A. in Cognitive Psychology and extensive experience designing complex enterprise and security-driven systems. Skilled in leading end-to-end design processes within cross-functional product teams, translating complex workflows into clear interaction models for mission-critical, data-rich web applications. Strong background in usability, accessibility, and design systems.

Professional Experience

Senior Product Designer and Researcher · Verint

2021–Present

- Own end-to-end design for several enterprise web systems within cross-functional product teams
- Lead interaction design, user flows, wireframes, and detailed specifications
- Collaborate closely with Product Managers and Development teams
- Analyze user behavior using Pendo to guide design improvements
- Support accessibility compliance and design system documentation

Senior UX Designer · IDF (8200)

Aug 2017–2021 · through UI Human Factors

- Led UX design for web-based intelligence and operational systems, including workflow management and internal service applications
- Owned interaction design, system logic structuring, and detailed specifications for complex, multi-role platforms
- Contributed to the development of a centralized design system in coordination with visual design leadership to improve consistency and scalability across systems

Senior UX Designer · Microsoft, Deloitte and other projects

Dec 2016–Jul 2017 · through UI Human Factors

- Microsoft – Contributed to UX design and specifications for an enterprise eDiscovery tool
- Deloitte – Conducted usability testing for desktop and mobile loan application systems, analyzed findings and recommended usability improvements

Senior UX Designer · HPE (Hewlett-Packard Enterprise)

Jan 2016–Nov 2016 · through UI Human Factors

- Redesigned the administration console of a reporting platform used by IT managers
- Planned, conducted, and analyzed usability testing for a big-data analytics web application serving enterprise IT teams

Senior UX Designer · IDF (Ofek) continued + the below:

2014–2015 · through UI Human Factors

- Athena (MER group) - Expert UX evaluation for an intelligence system and following it, providing comprehensive design guidelines for system enhancements
- Tel-Aviv municipality - Contributed content ideas and recommendations for the municipality's mobile app

Senior UX Designer · NCR (formerly Retalix)

2012–2013 · through UI Human Factors

- Designed an iPad-based cashier interface focused on operational efficiency and usability
- Designed customer-facing touch-screen kiosk system
- Enhanced existing retail management and POS platforms: touch screen (non-mobile) cash register, desktop application for managing stores, inventory, and more

Senior UX Designer · IDF (Ofek)

2007–2012 · *through UI Human Factors*

- Supported and evolved a complex control and monitoring desktop system incorporating GIS components
- Produced detailed functional specifications and stakeholder demos
- Managed project timelines and coordinated cross-functional collaboration

UX Designer · Various projects within UI Human Factors

2005–2007

- Contributed to UX design across enterprise, financial, medical device, and high-tech systems, including customer service platforms and banking applications

Researcher and Project Coordinator · NITE (National Institute for Testing and Evaluation)

2000–2004

- Performed quantitative and qualitative analyses and coordinated multi-stage projects
