

Professional Summary

Senior product designer with an M.A. in Cognitive Psychology and extensive experience designing complex enterprise and security-driven systems. Skilled in leading end-to-end design processes within cross-functional product teams, translating complex workflows into clear interaction models for mission-critical, data-rich web applications. Strong background in usability, accessibility, and design systems.

Core Expertise

- Complex Enterprise Systems UX
- Multi-Layered Workflows & Operational Platforms
- Interaction Design & Detailed Specifications
- Design Systems & Component Documentation
- Accessibility Support & Compliance
- Data-Driven design Improvements (Pendo)

Professional Experience

2021–Present – Senior Product Designer and Researcher at Verint:

- Own end-to-end design for several enterprise web systems within cross-functional product teams.
- Lead interaction design, user flows, wireframes, and detailed specifications.
- Collaborate closely with Product Managers and Development teams.
- Analyze user behavior using Pendo to guide design improvements.
- Support accessibility compliance and design system documentation.

2005–2021 – Senior UX Designer at UI Human Factors:

Aug 2017–2021 | IDF (8200)

- Led UX design for web-based intelligence and operational systems, including workflow management and internal service applications.
- Owned interaction design, system logic structuring, and detailed specifications for complex, multi-role platforms.
- Contributed to the development of a centralized design system in coordination with visual design leadership to improve consistency and scalability across systems.

Dec 2016–Jul 2017 | Various projects including:

- Microsoft – Contributed to UX design and specifications for an enterprise eDiscovery tool.
- Deloitte – Conducted usability testing for desktop and mobile loan application systems, analyzed findings and recommended usability improvements.

2016–Dec 2016 | HPE (Hewlett-Packard Enterprise)

- Redesigned the administration console of a reporting platform used by IT managers.
- Planned, conducted, and analyzed usability testing for a big-data analytics web application serving enterprise IT teams.

2014–2015 | IDF (continuation of project from 2007 to 2012) + below projects:

- Expert UX evaluation for an intelligence system for Athena (MER group) and following it, providing comprehensive design guidelines for system enhancements.
- Helping provide content ideas for the mobile app of Tel-Aviv municipality.

2012–2013 | NCR (formerly Retalix)

- Designed an iPad-based cashier interface focused on operational efficiency and usability.
- Designed customer-facing touch-screen kiosk system.
- Enhanced existing retail management and POS platforms: Touch screen (non-mobile) cash register, desktop application for managing stores, inventory end more.

2007–2012 | IDF (Ofek)

- Supported and evolved a complex control and monitoring desktop system incorporating GIS components.
- Produced detailed functional specifications and stakeholder demos.
- Managed project timelines and coordinated cross-functional collaboration.

2005–2007 | Various projects within UI

- Contributed to UX design across enterprise, financial, medical device, and high-tech systems, including customer service platforms and banking applications.

2000–2004 - Researcher and Project Coordinator at NITE (National Institute for Testing and Evaluation)

- Performed quantitative and qualitative analyses and coordinated multi-stage projects.

Education

1998–2000 - M.A. in cognitive psychology, Ben-Gurion University

1994–1998 - B.A. in psychology and sociology, Tel-Aviv University

Additional Skills and Information

Military service: 1990-1992, Designer on a Mac computer

Languages: Hebrew (native), English (proficient), Italian (basic)

Design tools: Figma (including Figma Make), Axure, Claude.

Other tools: Pendo, Confluence, Jira, Monday, Claude, Copilot.
